Representative

Distributor

Design-Build

Manufacturer's Representative

PECO's innovative employees provide engineering solutions that save customers money. Each product line provides a specific opportunity in the support of an ever-changing market. By representing many quality components, PECO personnel can provide a broad approach and full-system analysis to best service each customer. Our company places a strong emphasis on maintaining good relationships with customers.

Before we begin developing a solution we work hard to fully understand every aspect of the system function. When we're sure we understand your

needs, we assemble our many resources and specialists to find and implement the best solution the first time and every time.

Put us to work for you!

Sample of Industries We Serve

- Automotive
- Food Process
- Renewable Energy
- Plastic Molding
- Brewery
- Plating Plants
- Steel Fabrication
- Furniture
- Marine
- Paper Products

Manufacturer's Distributer

PECO offers a wide variety of filter media, pumps and pump accessories, and steam or hydronic componentry. Each manufacturer offers a wide range of equipment in the application of fluid handling, filtration, and heat transfer.

PECO's value-added mentality ensures we can assist you with a well branded, top-performing product to serve your needs.

The processes in each facility are very different from one to the next but our commitment to assisting

many manufacturers in their distribution while keeping your key interests in mind serve a pivotal role.

Integrating these pieces into plant infrastructure as well as our own systems, is key in making every project a success. We work directly with you and your personnel to meet and exceed your expectations.

Product Integrators

- Aftermarket Solutions
- OEM
- System Designers
- Engineered Systems
- Fluid Handling

The Power of Design Concept

- Chilled Water System
- Boiler Packaged Systems
- Pump Tank Assembly
- Tower Water Package
- Packaged Fluid Filters
- Sand Filtration Systems
- Process Reservoirs
- Actuated Valve Systems

Packaged Water Systems

When it comes to process systems, PECO understands that while many installations are very similar, very few are exactly the same.

We have built systems including a simple single pump to a multi-pump—multi-tower computer-controlled system. We are ready to provide you with a combination of quality components and expertise that results in a heating or cooling system that meets the challenges of your specific application.

Our process systems are delivered on skids and are supplied with detailed CAD dimensional drawings that contain all instructions, flow schematics, electrical wiring diagrams, plus performance settings for all equipment. This will provide your plant engineers with the information they need to successfully install the system.

You'll also be getting our commitment to assist you before, during and after the sale.
