

Process Engineering  
& Equipment Company

PECO combines proven engineering practices, quality components, and hands-on fabrication experience to deliver systems that solve real-world process challenges — whether you're building new, upgrading, or replacing legacy systems.

# PECO Engineered

## The PECO Advantage

Best in class service combined with engineering expertise

- > Engineered 3D models and P&ID's for every project
- > Over 30 years of applied engineering and solutions experience
- > Additional parts, accessories, and repair services to keep you running

## Best in class partners

BALTIMORE AIRCOIL COMPANY

Baltimore Aircoil Company (BAC) is a global innovator in cooling solutions. Energy and water efficient designs for evaporative cooling, thermal storage, & heat transfer technologies.

Ecochillers is a manufacturer of energy-efficient, environmentally friendly chiller systems, providing reliable and sustainable cooling solutions for industrial and commercial applications.

Hurst Boiler & Welding Co.: Industry leader in high-performance boilers, providing innovative & energy-efficient steam/ hot water solutions for industrial, commercial, & institutional applications.

Autoflame is a global leader in combustion control and boiler optimization, delivering innovative systems that improve energy efficiency, reduce emissions, and enhance performance for industrial and commercial boiler applications.

Grundfos advanced pump solutions and water technology are designed to deliver. Their innovative and energy-efficient pumping systems address the world's water and climate challenges.

Goulds Water Technology, a Xylem brand, is a trusted leader in residential, commercial, and agricultural water systems, offering durable, high-performance pumps and solutions that ensure reliable water movement and management.

CAMUS Hydronics Ltd. is the most trusted source of high-efficiency, hydronic boilers and water heaters, with deep solutions expertise in commercial, industrial, & residential applications.

Proud manufacturers of the Ultratec fully-condensing boiler line. Ultratec Boilers surpass the competition in efficiency and reliability while remaining incredibly simple to maintain. All boilers are Hydrogen-ready using the factory fitted Llimpsfield burner and come with a 5 year guarantee.

## Turn Key Solutions

Custom Skid Package designed, engineered, and delivered

- > Modular, scalable designs tailored to your unique process
- > Wide selection of high performance pumps valves, sensors, and controls
- > Process safety and redundancy built into critical systems
- > Seamless integration with existing plant utilities and controls
